Practical Programming Exercises

This project contains my exercises and homehowk for the course, Practical programming and numerical methods.

As per instructed, the folder is public and the code is written in C#.

The folder exercises contain the exercises, the folder homework contain the homework and the folder lectures contain the exercises done at the lectures, which I have largely copied during the lectures, they are not mandatory for this course.

Compiler version

Arch Linux: Mono C# 6.12.0.0, and GCC 11.1.0, and GNU Make 4.3
